ROYAL LIFT

Royal Lift is a strong lifting and rejuvenating treatment for the face and neck. Strongly moisturizes the skin, strengthens its antioxidant system, while tightening and regenerating. The unique combination of two stimulant formulations based on polynucleotides and hyaluronic acid provides not only to improve the quality and density of the skin, but also to improve the contour of the face and neck. ROYAL LIFT is a safe treatment that can be used all year round.

The effects are visible after the first treatment,
We recommend a series of 3-4 treatments up to 21 days.

INDICATIONS

- lack of tension and firmness
- wrinkles
- furrows
- grey and dull skin
- lack of skin elasticity
- lack of elasticity of the skin
- no clearly outlined facial oval

CONTRAINDICATIONS

- cancer diseases
- viral diseases
- active herpes
- infections of the body
- Pregnancy and breastfeeding
- propensity to keratosis
- blood clotting problems
- taking blood-thinning medicines
- allergy to any ingredient of products

ROYAL LIFT

The **Royal Lift** treatment consists of combining **NUCLEOLIFT** with **CYTOCARE 640** or with **CYTOCARE 715**, which have in their composition high molecular hyaluronic acid.

This combination of ingredients allows for strong regeneration and stimulation of fibroblasts to produce new collagen and elastin bonds.

High quality products and their consistency allow us to get an immediate effect of improving facial oval and skin tone.

To achieve a strong lifting effect, MAESELLE has developed a technique of **10** points for the face and **9** points for the neck so as to strengthen the effect and stimulate the cells more to act.

1. Cleanse the face
2. Disinfection of the treatment field
3. Optionally apply anesthesia
4. We combine preparations in a ratio of 1:1
5. We serve the stimulation cocktail with the technique of 10 points on the face and a 9-point neck.
6. Skin disinfection after treatment
7. Apply the cream after the procedure
8. Apply SPF cream
